Our Mission

Quest Community Health Centre provides primary health care services to individuals experiencing social, economic and cultural barriers while promoting wellness, community and social justice.

We Believe

Oral Health is an essential component of overall health and quality of life.

“The right care, by the right provider, at the right time”

CHCs enhance client care through prevention and disease management, delivered by an inter-professional team working in a collaborative practice.

At Quest CHC's Volunteer Dental Program, we have two fully equipped dental operatories, and provide basic dental care for those individuals within the Quest CHC priority population who would otherwise not have access to dental care.

Dental

Quest's Volunteer Dental Program has been made possible through the support and contributions of our Dental Advisory Committee, Ontario Trillium Foundation (OTF), Niagara Region Public Health (via Healthy Smiles Ontario) and donations from Henry Schein Canada Inc..

Using a team approach, the dental program focuses on:

- Removing barriers that prevent access to dental care
- Oral Health promotion and education
- Providing a range of oral health and primary care services for Quest's CHC's priority populations
- Increasing awareness and access to services and support in the community

Our Beliefs and Core Values

Quest believes that all people have a right to be treated with dignity and respect, acknowledging that all forms of oppression including racism, sexism, ableism, heterosexism, ageism, classism and economic oppression impact the health and well-being of individuals and communities.

The CHC model of care focuses on:

- Primary care
- Health promotion
- Community capacity building
- Illness prevention
- Service integration
- Advocacy
